MASTER OF METALLICS

TONE Think of your design as metallic mixology. Make it especially intriguing with a concoction of warm and cool—a brushed nickel fixture with a copper tile backsplash is both unexpected and appealing.

SHAPE Geometry rules! Angles add attitude and circular forms soften, so don't hesitate to try hexagonal hardware with penny tile. The equation is sure to result in pure perfection.

TEXTURE Whether it be brushed, polished, hammered or distressed, all metallics have the potential to feel right at home. Try combining a few variations of texture to strike just the right balance. Keep in mind when selecting tile, flooring, countertops and accessories that neutral linens and natural stone complement metallic tones best.
